

ROSECO SCRAP EXCHANGE PROGRAM

REFINE YOUR SCRAP FOR 107% OF SETTLEMENT
WHEN APPLIED TO YOUR ROSECO ACCOUNT.

Fast settlements with no minimums or assay fees!

Trade your scraps for credit towards findings, mountings, stones, metals, tools, supplies, equipment, and more!

Get 107% of the settlement amount when credited to your Roseco account. *The 107% credit applies only towards future purchases or payment of current invoices no older than 10 days.* Credit applied to past due invoices will be credited at 100% of the settlement amount.

You can opt to split any percentage of the settlement amount between a check and your 107% Roseco credit. You can also choose to receive fine gold, silver, or a check for your entire settlement amount.

NTR Refining – Experience the Difference

We will always handle your scrap shipment with the same honesty and integrity that you've come to expect from us. When your scrap shipments arrive, we will verify the integrity of the metal and confirm the weight. Next, we will melt your clean scrap and fire assay a sample. We will then notify you of the results.

All settlements are based on after-melt weight. You may choose to lock in the metal market in advance or use the closing live market on the day of receipt.

Settlement Percentages – No Hidden Fees

98% on clean karated gold. 90% on platinum, silver, palladium, and sweeps. Settlement amounts are determined by NTR. Roseco does not assume responsibility for settlement.

Stone Removal

Our stone removal process is quick and accurate at an additional 1% charge. We remove stones from karat gold and platinum jewelry without damage to the stones.

Preparing Your Shipment

We accept packages via Brinks, FedEx, UPS, and United States Postal Service to our national sales office in Dallas, Texas. Please be sure to include a completed packing slip (see back of this page) with your scrap shipment. Send your shipment to:

Send your shipment to: Roseco - NTR Office or
